Øving 1 Fra Arbeid

Simple Pendulum

Teoretisk Periode: $T = 2\pi\sqrt{\frac{l}{g}}$

Lett stang ($m =$)

l	T
0.600	
0.400	
0.200	

Tung stang ($m =$)

l	T
0.600	
0.400	
0.200	

Compound Pendulum

$$T = 2\pi\sqrt{\frac{I_A}{m_{rod}\, g\, h}} \quad \text{eller} \quad T = 2\pi\sqrt{\frac{k_{gyrad}^2 + h^2}{g h}}$$

$$I_A = \frac{m_{rod} L^2}{12} + m_{rod} h^2, \quad r_{gyrad} = \sqrt{\frac{I_{rod}}{m_{rod}}}$$
